

Andrew Johnson

Full Stack Developer

 andrewjohnson9393@gmail.com |  214-457-3338 |  [GitHub](#) |  [LinkedIn](#) [Portfolio](#)

Summary

Full Stack Software Engineer with 5+ years of professional experience in design, development, and troubleshooting of fullstack applications across microservice and micro-frontend architectures. Proficient in Java, Python, Node.js, React, and Spring Boot for backend and frontend development. Skilled in building secure, production-ready code, APIs, big data pipelines, and scalable cloud-native applications. Strong experience with SQL/NoSQL databases (PostgreSQL, MySQL, MongoDB, Cassandra, DynamoDB, Elasticsearch), CI/CD pipelines (Jenkins, Terraform, Spinnaker), and AWS services (Lambda, ECS, RDS, S3, EMR, Glue). Adept at applying Test Driven Development (TDD), debugging, and producing high-quality architecture artifacts. Certified in Basic Life Support (BLS, 2025) and open to obtaining any additional certifications required.

Professional Experience

Full Stack Developer Intern

Next Play Nation | Apr 2025 – Jun 2025 | [Live Project Internship Web App](#) [Internship Recommendation Letter](#)

- Developed and maintained React micro-frontends integrated with Node.js and Spring Boot APIs in a microservice-style architecture.
 - Implemented RESTful and GraphQL APIs supporting data integrations and internal tooling.
 - Applied Test Driven Development (TDD) with Jest, React Testing Library, and Supertest to validate features.
 - Optimized system performance and resolved technical issues, applying debugging and system architecture troubleshooting skills.
 - Participated in code reviews and Agile ceremonies, contributing to a collaborative engineering culture.
-

Software Developer (Deployed Web Applications) | [Shoe Store Web / Mobile E-Commerce App](#) | [React Native Mobile App](#) | [Python Student Database App](#) | [Java Spring Boot User Auth App](#)

Various Applications | 2023 – 2025

- E-Commerce App (MERN + Stripe) with MongoDB, scalable APIs, payment flows, and role-based access.
 - Java Spring Boot + React User Auth System with JWT sessions, secure APIs, and Dockerized deployments.
 - Real-time Note Tracking App using React, Django, WebSockets, and Redis for collaborative editing.
 - Built big data pipeline features integrating APIs, databases, and analytics dashboards.
 - Implemented CI/CD pipelines (Jenkins, Docker, Terraform) to streamline deployments.
 - Utilized AWS services (S3, ECS, Lambda, RDS) for cloud-hosted solutions, gaining exposure to EMR and Glue for data workflows.
 - Applied containerization and orchestration with Docker and Kubernetes for scalable deployments.
-

Education

B.S. in Information Technology – Software Engineering

Middle Georgia State University, Macon, GA

Technical Skills

- **Frontend:** React.js (components, state, props, hooks, context), Redux, Zustand, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
 - **Backend:** Node.js, Express.js, Python (Django/DRF, Channels), Java (Spring Boot), RESTful APIs, GraphQL, WebSockets, Socket.IO
 - **Databases:** MongoDB, MySQL, PostgreSQL
 - **Cloud & DevOps:** AWS (S3, Amplify, EC2, Elastic Beanstalk), Docker, Kubernetes (familiar), Jenkins, CI/CD pipelines
 - **Testing & QA:** Jest, React Testing Library, Supertest, Playwright, Selenium, JUnit 5
 - **Other:** API & Webhook Development, Automation, Infrastructure Architecture, SaaS Platforms, Agile (Scrum, Sprint Planning, Code Reviews), Security Best Practices
-
